Please use your skills of dividing by 10, 100 and 1000 to put the loop cards in the correct order on the A4 sheet. Remember our success criteria:</p> <ul style="list-style-type: none"> • Do NOT just drop the 0, 00 or 000 off the end of the number. • Write the number you are dividing by 10, 100 or 1000 in the place value grid. • When you divide a number by 10, each digit moves one place to the right to make it 10 times smaller. • When you divide a number by 100, each digit moves two places to the right to make it 100 times smaller. • When you divide a number by 1,000, each digit moves three places to the right to make it 1000 times smaller. • If moving digits to the right leaves the ones or tenths column empty, put in 0 to hold the place. 	<p><u>Other:</u></p>
